

Ex. No.: 2(b)

Shell Script

Name:Rithupriya S

Date: 28.01.2025

Roll no:231901043

Aim:

To write a Shell script to check whether a given year is a leap year or not using conditional statements.

Algorithm:

1. Start the script.
2. Prompt the user to enter a year.
3. Read the input year.
4. Check the leap year condition:
 - A year is a leap year if it is divisible by 4 **and** not divisible by 100, **or** divisible by 400.
5. Display whether it is a leap year or not.
6. End the script.

Program: (leap.sh)

```
#!/bin/bash
```

```
# Script to check leap year
```

```
echo "Enter year:" read
```

```
year
```

```
if [ $((year % 4)) -eq 0 ]; then    if [ $((year % 100)) -ne 0 ] ||
```

```
[ $((year % 400)) -eq 0 ]; then    echo "Leap year"
```

```
else
```

```
    echo "Not a leap year"
```

```
fi
```

```
else
```

```
    echo "Not a leap year"  
fi
```

Sample Input and Output: [REC@localhost

~]\$ sh leap.sh

Enter year:

12

Leap year

Result:

The Shell script to test whether the given year is a leap year or not was successfully implemented and executed, and the output was verified.
